SMART CONNECTED

LZSTL8WSSP

Simplify Maintenance with Smarter Tracking

Offer fresh, filtered water and track usage across every unit, while reducing total cost of ownership. Track bottles saved, filter status and water usage, and schedule flushing events to keep lines cleaner. Ideal for large offices, airports, colleges and public facilities. Uses plumbSMART™ software powered by Zurn Elkay, which integrates with a variety of smart plumbing products.

Why Choose Smart Bottle Filling Stations?

- Save time, money and decrease total cost of ownership.

- Monitor filter status across all units, making it easier to plan and anticipate filter replacements.

- Save time and effort by viewing Bottles Saved metrics across all units in the building or campus.

- Understand the volume of water consumed vs wasted at a glance, across all connected units.

- Schedule flushing events from your desktop, with automatic record-keeping to ensure compliance and safety.

Also available – retrofit kit!

Allows any enhanced bottle filling station manufactured after April 2019 to be connected to a gateway (sold separately). The beginning of your unit serial number indicates your production date – please check to ensure compatibility.
