

Zurn and Elkay Combine to Be the Unrivaled Leader in Sustainable Water Solutions

Zurn Water Solutions and Elkay Manufacturing have combined to create Zurn Elkay Water Solutions — one of the largest providers of water management solutions to improve health and the environment. The combined company offers the most comprehensive product portfolio for vertical segments providing water quality and water conservation solutions to critical areas including education and health care.

The Zurn Elkay Difference

Healthier Hydration and Hygiene

With a mission focused on healthier hydration and hygiene, reliable water has never been more important than it is today. Zurn Elkay will continue to focus on the health of children in schools by encouraging the use of Elementary and Secondary School Emergency Relief (ESSER) funds to provide healthier, more hygienic solutions to their students. As a part of the American Rescue Plan (ARP), ESSER provides funding to support the safe, hygienic reopening and operations of schools following the COVID-19 pandemic. Zurn Elkay's product portfolio includes a high-performing package of hygienic and hands-free solutions that will help bring schools up to today's health standards.

Environmental Solutions

Together, Zurn Elkay leads the way with water solutions for a wider range of customers backed by the same premier customer support. Bringing these two businesses together creates a comprehensive portfolio of unrivaled water solutions that will impact everything from drinking water, water safety and control, to hygienic and environmental solutions and innovative flow systems. To date, more than 56 billion plastic bottles have been saved from the environment and more than 34 billion gallons of water have been conserved due to the innovative solutions provided by Zurn Elkay.

Product Innovations

PEX: Zurn PEX offers a complete plumbing solution, specializes in cross linked polyethylene tubing for use in plumbing, radiant heating, snow melt applications and more.

Small Backflow Preventers: Zurn Wilkins 900 series robust construction and economical repair kits save time and money over the product's lifespan.

ezH2O Liv®: The first of its kind built-in filtered water dispenser for both home and commercial spaces.

Dart Canyon®: Dual-depth stainless sink prioritizes accessibility, offering in-sink organization with custom-sized accessories.
