ELKAY® FACT SHEET

ezH2O® Smart Bottle Filling Stations

Our popular ezH2O® bottle filling stations have been made smarter. New connected models offer fresh, filtered water while letting facility managers track stats across every unit. Campuses and large complexes can reduce their total cost of ownership by tracking bottles saved, filter status and water usage, and schedule flushing events to help keep lines cleaner.

Ideal for large offices, airports, colleges and public facilities. Uses plumbSMART™ software powered by Zurn Elkay, which integrates with a variety of smart plumbing products.

The Elkay Difference: Smart and Enhanced Features

See the Status: Monitor filter status across all units, making it easier to plan and anticipate filter replacements.

View Metrics: See Bottles saved, water consumed vs wasted and usage patterns across buildings and campuses.

Schedule Flushing: Scheduled flushing based on usage helps ensure compliance and safety, and keeps records automatically.

Faster Filter Changes: Select enhanced units feature our quick filter-change wrapper that provides easy access and quicker changes.

Automatic Filter Recognition: FillSafe™ recognition updates LED light back to green when a new filter is installed.

Also available – retrofit kit!

Allows any enhanced bottle filling station manufactured after April 2019 to be connected to a gateway (sold separately). The beginning of your unit serial number indicates your production date – please check to ensure compatibility.

The Details

- **Material:** Stainless Steel Finish
- **Model(s):** LZS8WSSP-W1, LZSTL8WSSP-W1
- **List Price:** \$2,894 to \$3,884
- **Availability:** Feb. 19, 2024
- **Product Details:** [Elkay.com/drinking-water](https://elkay.com/drinking-water)
- **Contact:** ZurnElkayPR@elkay.com
